

INDEX FOR VOLUME 38

- Andersen, Erling B. A goodness of fit test for the Rasch model. 123-140.
- Archer, Claude O. (with Jennrich). Standard errors for rotated factor loadings. 581-592.
- Bechtel, Gordon G. Nonlinear submodels of orthogonal linear models. 379-392.
- Bock, R. Darrell. Word and image: Sources of the verbal and spatial factors in mental test scores. 437-458.
- Castellan, Jr., N. John. Comments on the "lens model" equation and the analysis of multiple-cue judgment tasks. 87-100.
- Clark, R. Malcolm. A test of inclusion which allows for errors of measurement. 77-86.
- Conger, Anthony J. (with Lipshitz). Measures of reliability for profiles and test batteries. 411-427.
- Davidson, John. A geometrical analysis of the unfolding model: General solutions. 305-336.
- Dunn, James E. A note on a sufficiency condition for uniqueness of a restricted factor matrix. 141-143.
- Ekman, Gösta (with Lundberg). Subjective geographic distance. A multidimensional comparison. 113-122.
- Fishburn, Peter C. On the construction of weak orders from fragmentary information. 459-472.
- Frawley, W. H. (with Schucany). A rank test for two group concordance. 249-258.
- Gleason, Terry C. (with Staelin). Improving the metric quality of questionnaire data. 393-410.
- Gold, E. Mark. Metric unfolding: Data requirement for unique solution & clarification of Schonemann's algorithm. 555-570.
- Gross, Alan L. Prediction in future samples studied in terms of the gain from selection. 151-172.
- Hettmansperger, Thomas P. (with Thomas). Estimation of J scales for unidimensional unfolding. 269-284.
- Hubert, Lawrence. Monotone invariant clustering procedures. 47-62.
- Hubert, Lawrence. Min and max hierarchical clustering using asymmetric similarity measures. 63-72.
- Jackson, Paul H. (with Lewis and Novick). The estimation of proportions in m groups. 19-46.
- Jackson, Paul H. The estimation of true score variance in the classical test theory model. 183-201.
- Jennrich, Robert I. (with Thayer). A note on Lawley's formulas with standard errors in maximum likelihood factor analysis. 571-580.
- Jennrich, Robert I. (with Archer). Standard errors for rotated factor loadings. 581-592.
- Jennrich, Robert I. Standard errors for obliquely rotated factor loadings. 593-604.
- Joe, George W. (with Woodward). Maximizing the coefficient of generalizability in multifacet decision studies. 173-181.
- Johnson, Richard M. Pairwise nonmetric multidimensional scaling. 11-18.
- Kirk, David B. On the numerical approximation of the bivariate normal (tetrachoric) correlation coefficient. 259-268.
- Koopman, Raymond F. Determining parameter values in the generalized image system. 495-512.

- Krishnan, T. On linear combinations of binary item scores. 291-304.
- Kristof, Walter. Testing a linear relation between true scores of two measures. 101-111.
- Lewis, Charles (with Tucker). A reliability coefficient for maximum likelihood factor analysis 1-10.
- Lewis, Charles (with Jackson and Novick). The estimation of proportions in m groups. 19-46.
- Lipshitz, Raana (with Cooper). Measures of reliability for profiles and test batteries. 411-427.
- Lundberg, Ulf (with Ekman). Subjective geographic distance. A multidimensional comparison. 113-122.
- Meredith, William (with Kearns). Empirical Bayes point estimates of latent trait scores without knowledge of the trait distribution. 553-554.
- Meyer, Edward P. Note on the Guttman-Harris uniqueness estimate. 371-374.
- Meyer, Edward P. On the relationship between ratio of number of variables to number of factors and factorial determinacy. 375-378.
- Novick, Melvin R. (with Jackson and Lewis). The estimation of proportions in m groups. 19-46.
- Ramsay, J. O. The effect of number of categories in rating scales on precision of estimation of scale value. 513-532.
- Samejima, Fumiko. Homogeneous case of the continuous response model. 203-219.
- Samejima, Fumiko. A comment on Birnbaum's three-parameter logistic model in the latent trait theory. 221-233.
- Schucany, W. R. (with Frawley). A rank test for two group concordance. 249-258.
- Shocker, Allan D. (with Srinivasan). Linear programming techniques for multidimensional analysis of preferences. 337-369.
- Shocker, Allan D. (with Srinivasan). Estimating the weights for multiple attributes in a composite using pairwise judgments. 473-494.
- Sixtl, Friedrich. Probabilistic unfolding. 235-248.
- Srinivasan, V. (with Shocker). Linear programming techniques for multidimensional analysis of preferences. 337-369.
- Srinivasan, V. (with Shocker). Estimating the weights for multiple attributes in a composite using pairwise judgments. 473-494.
- Staelin, Richard (with Gleason). Improving the metric quality of questionnaire data. 393-410.
- Thayer, Dorothy T. (with Jennrich). A note on Lawley's formula for standard errors in maximum likelihood factor analysis. 571-580.
- Thomas, Hoben (with Hettmansperger). Estimation of J scales for unidimensional unfolding. 269-284.
- Tucker, Ledyard R. (with Lewis). A reliability coefficient for maximum likelihood factor analysis. 1-10.
- Tuiman, J. Jaap. A note on $H = \log_2 m$. 73-75.
- White, Richard T. A test of inclusion which allows for errors of measurement. 77-86.
- Woodward, J. Arthur (with Joe). Maximizing the coefficient of generalizability in multifacet decision studies. 173-181.

REVIEWS

- Green, Jr., B. F. Review of *The measurement of sensation*, by C. W. Savage. 146-147.
- Kavanagh, Jack A. Review of *Mathematical model techniques for learning theories*, by G. Levine and C. J. Burke. 615-616.
- Piwowski, Stanley A. Review of *Problemy psychologii matematycznej*, by Jozef Kozielski (Ed.). 432.

Posavac, E. J. Review of *Abilities: Their structure, growth, and action* by R. B. Cattell. 145-146.

Rapoport, Anatol. Review of *Problemy psychologii matematycznej* by Jozef Kozielski (Ed.). 429-432.

ERRATUM

Schonemann, Peter H. Erratum. 149.
